

SIGN THIS PETITION TO SUPPORT LABELING OF IRRADIATED AND GENETICALLY ENGINEERED FOOD

By signing this petition I call on the Food and Drug Administration to do the following:

1) In reference to Docket #98N-1038, the FDA should retain the current labeling requirements which include: use of the radura symbol on all irradiated foods and a statement such as "treated by irradiation". These should be prominently displayed and large enough to be readily visible to the consumer, on the front page of the package. The FDA's labeling requirements for irradiation should not be permitted to expire.

2) In reference to U.S. District Court for D.C. Docket No. 98-CV-1300 lawsuit which mandates that the FDA require labeling and safety testing of all genetically engineered foods. The FDA has a statutory mandate to protect public health and provide consumers with relevant information about the foods they eat. The FDA is ignoring that mandate with regard to its policy on genetically-engineered food. In addition, the FDA policy is a violation of religious freedom and consumer right to know laws.
